

# *Journal of Biological Education*

Published by the Society of Biology  
9 Red Lion Court, London EC4A 3EF  
Tel: 020 7936 5900

**Journal of Biological Education (JBE)** – reports the latest developments in biology education and is the only journal to carry original education research exclusively in the biosciences. It is reported in a manner that is easily understood, making it perfect for both biology teachers and educational researchers.

## **Target Readership**

*JBE* is recognised to be required reading for all biology teachers, especially those that lead curriculum changes in their schools. This publication is essential for all involved in biology education, from student teachers to heads of department; and for those who train teachers and those who are researching educational methods in the biosciences.

The total readership is over 5,000 due to the high number of institutional subscribers and a high pass on rate. Not only does *JBE* go to subscribers, it also goes to an additional 250 schools as part of our Schools and Colleges Affiliation Scheme.

## **Society of Biology**

The Society of Biology promotes biology as a subject of choice to students in schools, colleges and universities. It supports and recognises excellence in biology teaching; champions a biology curriculum that challenges students and encourages their passion for biology; supports young scientists through higher education, and provides career guidance at all levels.

*JBE* – Published quarterly (A4 ): March - June - September - December

Copy deadline 1st of previous month.
